

Take any of the downtown bridges to the east side of the river and come south on McLoughlin (99E). Avoid the Macadam traffic for the Bridge if possible.

As you go down McLoughlin, you'll have a choice to either go through Sellwood or drive past and come in from the east. If you'd like to go through the neighborhood then take the Holgate St. exit, cross 99E, and then take a right on Milwaukie. Otherwise, continue on McLoughlin.

Too many people leave the shop only to sit waiting at the corner of 6th and Tacoma to turn left onto the Sellwood Bridge. There are two much easier ways. One is to turn **RIGHT** onto Tacoma, then left into the neighborhood. Make a few turns back toward Tacoma, then you'll have an easy right turn onto Tacoma and the Bridge. Alternatively, taking Tenino St. east and a left onto 7th gives you access to the turn lane on Tacoma, and from there you can continue on Tacoma St. over the bridge.
